Portfolio & GitHub: https://howtoquitvivek.linklee.in +91-9893637715

PROFESSIONAL SUMMARY

Full Stack Engineering student with experience building REST APIs, multi-tenant backend systems, authentication workflows, and AI-powered applications using FastAPI, Node.js, MongoDB, and React Native. AWS Certified Cloud Practitioner with strong CS fundamentals. I love creating minimalistic designs which makes user interaction easy and the user experience worthwhile.

CORE COMPETENCIES:

Backend Development | REST API Development | Authentication & Authorization | Problem Solving | DSA

EDUCATION

Gyan Ganga Institute of Technology and Sciences
Bachelor of Technology - Computer Science Engg. Data Science; CGPA: 7.1/10 *Expected Graduation: 2027*
St Joseph's Convent Senior Secondary School
Class XII: 83% | Physics, Chemistry, Mathematics, Computer Science — 2023, Class X: 90% — 2021

TECHNICAL SKILLS

- **Languages:** Python, C++, Javascript, SQL
- **Backend & Fronted:** FastAPI, Node.js, Express.js, REST APIs, Firebase Authentication, React/Svelte, Tailwind & Vanilla
- **Databases:** MySQL, MongoDB, SQLite
- **Tools:** Git, GitHub, Postman, **Cloud:** AWS(CPP)
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems

SOFT SKILLS & HOBBIES

Problem Solving • Communication • Team Collaboration • Adaptability • Analytical Thinking
Hobbies: Exploring Generative AI • Building Side Projects • Learning Emerging Technologies • Playing Guitar

EXPERIENCE

Internship; SRJS TECHNOLOGIES PRIVATE LIMITED *January 2026 - July 2026*
Tech: React Native, Expo, TypeScript, MongoDB, Express.js *Software Engineering Intern*
• Developed REST APIs and a multi-tenant backend powering inventory, billing, analytics, and customer ledger workflows.
• Built role-based authentication and admin dashboard modules using FastAPI, MongoDB, and Firebase Authentication.
• Developed AI-powered retail features including a conversational assistant, voice billing workflows, and analytics using LLMs.
• Integrated Android native modules, Firebase Authentication, and an XGBoost risk-scoring model into the production application.

Web Developer; Self-Employed / Freelance *November 2025 - Present*
Tech: Wordpress / React, Express.js, Firebase, MongoDB, Google Analytics, AWS
• Developed and deployed responsive business websites and web applications using React, Express.js, Firebase, MongoDB.
• Implemented authentication, CMS customization, SEO improvements, and custom business workflows for multiple clients.
• Managed deployment, maintenance, and client communication across end-to-end project delivery.

PROJECTS

Prahari — AI-Based Malicious APK Analyzer *GitHub:* https://github.com/howtoquitvivek/prahari-apk-analyzer
• Built an AI-powered Android malware detection platform using XGBoost and Androguard.
• Developed an automated APK feature extraction pipeline and Flask APIs for threat classification.
• Designed a risk-scoring engine generating explainable malware analysis reports.

TrackPaper —Paper Custody & Leak Detection System *GitHub:* https://github.com/howtoquitvivek/Trackpaper
• Built a zero-trust examination security platform featuring 2D-DCT invisible watermarking and SHA-256 tamper-evident hash-chain custody ledgers.
• Developed automated GPS geofencing APIs and a React Native field-agent app for 5-second real-time telemetry and physical custody tracking.
• Designed a multi-tier forensic leak attribution engine (DCT, LSB, Perceptual dHash) tracing photo leaks back to source centers with 99.8% accuracy.

ACHIEVEMENTS

- AWS Certified Cloud Practitioner (CLF-C02) • Winner, Cyber Shield 2025 Hackathon • 100+ DSA Problems Solved
